

Assessment of the Assessment/ Fourth Management Plan Development Pinal AMA

GUAC, January 10, 2012

Assessment of the Assessment

Where do we think we might be in 2025?

GUAC, January 10, 2012

Projected Demand and Supply in 2025:

CATEGORY	SCENARIO ONE	SCENARIO TWO	SCENARIO THREE	2009 HISTORICAL
Municipal	112,809	121,175	160,273	37,313
Industrial	25,189	31,042	43,676	23,841
Agricultural	588,157	689,180	877,896	896,509
Indian	154,234	195,401	239,479	164,814
TOTAL DEMAND	880,389	1,036,797	1,321,324	1,122,477
Renewable Supplies to Meet Demand ¹	474,979	480,822	490,637	527,421
Groundwater to Meet Demand	405,411	555,975	830,687	595,056
Offsets to GW Pumping ²	374,578	382,491	396,014	406,271
OVERDRAFT³	30,833	173,485	434,673	188,785

¹ Includes CAP, Surface Water and Reclaimed Water

² Includes Incidental Recharge, Canal Seepage, CAGR D Replenishment, Cuts to the Aquifer, and Net Natural Recharge

³ Includes GW Allowance pumping

Water Management Goal versus Uncertainties

AMA Goal:

“...allow development of non-irrigation uses... and... preserve existing agricultural economies in the active management area for as long as feasible, consistent with the necessity to preserve future water supplies for non-irrigation uses.”

Future Changing Conditions and Future Uncertainties :

- Impact of lagged incidental recharge (delayed effect from reduced pumping)
- Difficulty projecting the nature of the agricultural economy
- Difficulty projecting the nature of the development economy
- Reduction in excess CAP (AWBA GSF in PAMA)
- Reduction to the CAP Ag Pool (reductions to the Ag Pool in 2017 and 2024, and elimination of the Ag Pool in 2030)
- Climate/Drought

ADWR Management Plans

1MP:

- Foundation for 2MP and 3MP
- Compiled demand/supply data
- Included water budgets
- Established water conservation programs by sector
- Set the stage for Well and AWS Rules
- Established a monitoring and enforcement program

ADWR Management Plans

2MP:

- More detailed analysis of demand/supply by sector, hydrology, and water quality
- Use of computerized mapping, hydrologic modeling and more detailed data analysis by sector
- Augmentation/Re-Use Program
- Agricultural & Municipal Flexibility Accounting Provisions
- Plan Implementation Approach
- Modifications-
 - ✓ Large Untreated Providers
 - ✓ Prohibit recovery of stored water in another AMA
 - ✓ 4' decline rate for recovery outside the AOHI
 - ✓ Conservation Assistance Program
 - ✓ Clarification of Municipal/Industrial/Agricultural Programs

ADWR Management Plans

3MP:

- More flexibility in all sector conservation programs, including incentives and multiple conservation programs to choose from
- More detailed discussion of hydrology (models completed for four AMAs by the 3MP)
- Water Management Assistance Program
- Modifications-
 - ✓ Ag BMP Program
 - ✓ Adjustments to NPCCP and Industrial Programs (slightly revised BMPs, clarification of some Industrial programs)
 - ✓ Adjustments to Water Management Assistance Program for grants funding (to comply with statutory change for allocation of grants funds)
 - ✓ MNPCCP

ADWR Responsiveness:

Statute/Rule Changes Summary (previous plans)

- Allotments for industrial users
- Intermediate conservation requirements
- Small provider exemption from Large provider programs (100 acre-feet or less)
- Underground Storage and Recovery Program
- Two year notice to comply with conservation requirements
- Individual User Compliance Provision
- Spill water excluded from compliance
- Conservation Assistance Program
- Flex credit transfer provisions
- Reclaimed water excluded from compliance
- Non-Per Capita and Modified Non-Per Capita Programs
- Small Provider (250 acre-feet or less) and Small IGFR Exemption (less than 10 acres)
- Ag Historic Cropping Program
- Ag BMP Program
- Other non-management plan statutory/rule changes

The Tools We Have:

- Management Plans/Conservation Programs
- AWS Rules
- Recharge Program
- Well Rules
- Statutory Authority and Compliance
- Community Input and Other Agency Coordination

The Tools We Need?

FOR DISCUSSION IN THE 4MP:

- Local/Regional Cooperative Water Management
- Localized Groundwater Management
- Location of Underground Storage vs. Location of Annual or LTS Credit Recovery
- Climate Change Planning and Response Program
- Short-Term Drought Response Program
- Additional Infrastructure and Funding
- Ability to respond positively to economic growth without increasing groundwater withdrawals
- Planning horizon beyond 2025
- Other ideas?

4MP

- No change to the Agricultural Programs
- No change to the Industrial Programs
- Updates to some MNPCCP BMP descriptions and changes to other Municipal Programs-
 - ✓ Eliminate the Alternative Conservation Program
 - ✓ Simplify Total GPCD Program based on a percent reduction (eliminate the component method)
- “The Plan”
 - ✓ How do we increase the water supply?
 - ✓ How do we decrease groundwater dependency?
 - ✓ How can we respond to/prepare for change?
 - ✓ In what ways can we begin building the path to water management solutions?
 - Establish collaborative/cooperative water management
 - Flexible/responsive management approaches
 - Examine/define infrastructure needs

4MP Structure

- First three chapters similar to 3MP but incorporate Assessment data
 - ✓ Summarize statutory and rule changes
 - ✓ Changes in hydrologic conditions since the 3MP
 - ✓ Historical data and assessment 1985-2009
- Next three chapters will be Agricultural, Municipal and Industrial Programs, updated but essentially unchanged other than Municipal Program:
 - ✓ Streamlined Total GPCD Program,
 - ✓ No ACP and no NPCCP,
 - ✓ Updates to some MNPCCP BMP descriptions
- Groundwater Quality Management Chapter
- Augmentation and Recharge Chapter
- Water Management Assistance Chapter
- Plan Implementation Chapter
- Water Budgets and Projections (from Assessment data)
- Future Planning Chapter

4MP Proposed Timeline

- GUAC presentations on Assessment of the Assessment and 4MP Concepts (Jan/Feb 2012)
- Presentation of Draft 4MP at GUACs (April/May 2012 - PRAMA will be first)
- Distribution of Final Draft 4MP to GUAC for GUAC recommendations on the draft plan (August 2012 – 30 days for GUAC to review and comment)
- Promulgation of 4MP (October 2012)
- Public hearings (December 2012)
- First Order of Adoption (March 2013)
- Final Order of Adoption (May 2013)
- 4MP becomes effective (June 2013)
- Conservation requirements become effective (2-year notice)

4MP Staff and Public Comment

- ADWR 4MP Staff:
 - ✓Pam Muse
 - ✓Sharon Morris
 - ✓Ruth Greenhouse
 - ✓Mohammed Al-Sabbry
 - ✓Interns
 - ✓GIS/AMA/AMA Planning & Data Management Support
- Public Comment:
 - ✓GUACs will be forum for 4MP public comment

Questions/Discussion
